Bioinformatician turning exploratory genomics into reproducible, production-grade pipelines (Nextflow, Snakemake, Docker, Conda), specialising in chromosome conformation capture (Meta Hi-C, 3C-seq) and machine learning on bacterial pangenomes. Bridging academia and industry: Meta Hi-C for phage-therapy R&D at Phagos, an independently grant-funded project on the 3D genome of *B. thuringiensis*, and prior R&D in personalised medicine and cellular agriculture. Three publications and invited teaching on reproducibility; EU remote-first, open to B2B contracts and industrial PhD (CIFRE) partnerships.

EXPERIENCE

PHAGOS | Bioinformatics Intern
Jul 2026 -- Present | Remote / Paris, FR
- Deliver phage–host association calls into the therapeutic discovery pipeline by analysing Meta Hi-C data end-to-end, from raw reads to ranked pairings.
- Made analyses re-runnable and free of environment drift by rebuilding ad-hoc scripts as containerised Nextflow workflows (Docker, Conda) used across the R&D team.
- Guide two research projects and joint analyses with external academic partners (incl. Institut Pasteur), aligning experimental design with computational feasibility.

AMU, DEPT. OF MICROBIOLOGY | Contract Researcher
Sep 2025 -- Jul 2027 | Remote / Poznań, PL
- Won competitive Study@Research funding (app. nr. 201/34/UAM/0074) to run an independent project on the 3D genome of *B. thuringiensis*, owning Hi-C library prep, sequencing and analysis solo.
- Produced the dataset behind a first-author manuscript by mining the *B. thuringiensis* pangenome for Cry9 toxin determinants.
- Standardised the group's Hi-C/3C-seq analysis with reusable containerised workflows for contact-map QC and scaffolding.

DANUBE INT. SCHOOL VIENNA | Lab Assistant
Aug 2026 -- Jul 2028 | Vienna, AT
- Teach science through practical experiment: design and run hands-on labs, and mentor students through independent research projects.

GESELLSCHAFT FÜR BIOANALYTIK | Scientist
Jul 2024 -- Jun 2026 | Poznań, PL
- Delivered allergen analyses to commercial turnaround and QA standards, field to computational.

BENE MEAT TECHNOLOGIES | Bioinformatician
Mar 2024 -- Jul 2024 | Prague, CZ
- Supported cultivated-meat cell line R&D with transcriptomics, nanopore analyses and bioreactor automation.

LEIDEN UNIVERSITY MEDICAL CENTER | Intern, Endocrinology
Jun 2023 -- Oct 2023 | Leiden, NL
- Contributed to two peer-reviewed publications by building the pipelines and figures for a murine MASLD study.

MNM DIAGNOSTICS | Genome Analyst
Feb 2022 -- Jul 2022 | Poznań, PL
- Interpreted clinical whole-genome data for personalised oncology, reporting variants to clinicians.
